

IN THE SPECIFICATION

A substitute specification is presented in Appendix A. A marked-up copy of the substitute specification showing the matter to be added to and the matter being deleted from the specification of record is presented in Appendix B.

The substitute specification is believed free from new matter as the proposed amendments are believed to be fully supported by the specification, claims and drawings as originally filed, and thus Applicant submits that the substitute specification contains no new matter.

In view of the foregoing, Applicant respectfully requests that the Examiner enter the substitute specification into the application and make record of same by writing "Enter" or "OK to Enter" and the Examiner's initials in ink on the left margin of the first page of the substitute specification.
